

Sandeep Cheemakurthi

Results-driven software developer with 4+ years of hands-on experience in designing, developing, and deploying scalable web applications. Proficient in Angular, React, JavaScript, and backend integration using Node.js and SpringBoot. Skilled at building responsive UI components, integrating RESTful APIs, optimizing performance, and implementing Micro Frontends (MFE) using Web Components. Adept at working in agile environments, resolving production issues, and delivering high-quality code that aligns with business objectives.

WORK EXPERIENCE

DBS Tech India (DBS Bank)

Associate

Feb 2024 - Present

- Worked in the design, development, and optimization of scalable web applications using React and Angular for multiple projects.
- Integrated Angular components into React projects using Web Components to ensure code reusability and maintainability across multiple projects.
- Successfully integrated and managed APIs for various functionalities, ensuring smooth data flow and synchronization between frontend and backend systems.
- Collaborated closely with backend developers to enhance application performance, and optimized WebSocket communication in a chatbot application used across multiple projects.
- Designed and developed Java Spring Boot APIs to fetch data from databases and external systems, which were then consumed by frontend applications for seamless data flow.
- Ensured proper setup and validation of UAT and SIT environments, coordinating backend and frontend interactions for end-to-end testing.
- Conducted regular code reviews, participated in debugging, and contributed to optimizing the CI/CD pipeline.
- Troubleshoot and resolved production and UAT bugs, ensuring smooth deployment and feature delivery.
- Designed reusable Angular components to be used across different Angular-based projects to reduce development time and maintain consistency.

Analyst

Sep 2022 - Feb 2024

- Worked with React and Angular to build responsive and user-friendly web applications, ensuring cross-browser compatibility and seamless user experiences.
- Contributed to the creation of a chatbot application that communicated with RESTful APIs and WebSockets, helping improve user engagement across multiple projects.
- Integrated legacy JavaScript applications with new features to streamline document viewing and enhance user interactivity.
- Debugged and optimized CICD scripts to handle project build issues, ensuring smooth continuous integration and delivery.
- Followed up with users during UAT testing, gathering feedback, and troubleshooting bugs in production environments.
- Assisted in maintaining and enhancing a Spring-based backend project, implementing various system improvements and features.
- Developed Java Spring Boot APIs to interface with databases and downstream systems, providing structured data to frontend modules.
- Validated API responses in SIT and UAT environments and fixed defects related to API integration and data mapping.
- Worked closely with senior developers to understand the full software development lifecycle, gaining exposure to CI/CD processes.

- Assisted in the development and maintenance of web applications using Angular and React.
- Created reusable UI components in Angular, ensuring consistency and reducing time spent on future projects.
- Participated in debugging and optimizing existing web applications to improve performance and user experience.
- Assisted senior developers in integrating APIs and managing asynchronous programming with RESTful services.
- Contributed to resolving production bugs and participated in UAT testing with users to ensure proper application functionality.
- Gained experience in managing version control using Git, contributing to team-based development environments.
- Worked with Java Spring Boot to support simple API implementations used for internal tools and development purposes.
- Coordinated with frontend teams to test API integrations and validate request/response handling in dev and SIT environments.

SKILLS

Frontend:

- React, Angular, JavaScript, TypeScript, HTML5, CSS3, Redux, Tailwind CSS, Bootstrap, React Router DOM, Chart.js

Backend:

- Node.js, Express.js, SpringBoot, RESTful APIs, WebSocket

Database:

- MySQL, MariaDB

Development Practices:

- Micro Frontends (MFE), Web Components, CI/CD (Jenkins), Agile, UAT Testing, Lazy Loading, Performance Tuning, TDD

Version Control & Tools:

- Git (Branching, Rebase, Merge), GitHub, BitBucket, VS Code, Docker, Confluence, JIRA

PROJECTS

Personal Portfolio Website

- Enhanced a React portfolio project with a sleek, modern, and responsive design, utilizing React Router DOM for smooth navigation and react-tsparticles for interactive particle effects. Incorporated media queries for a mobile-first approach, ensuring seamless viewing across all devices. Added quick-access links to WhatsApp and Gmail, enabling effortless redirection on both mobile and desktop. Styled the application with React Icons for a professional and polished look. Deployed the project on GitHub Pages to showcase personal skills and projects effectively to a wider audience.

Data-Visualization React App with ChartJs and Axios

- Developed a dynamic and interactive data-visualization application using React. Integrated Axios for seamless API communication to fetch and manage data. Leveraged React Chart.js to create visually appealing and insightful charts. Ensured a responsive user experience by implementing media queries for various screen sizes. Used React's useState and useEffect hooks to manage component state and handle side effects efficiently. The application delivers a robust platform for analyzing and presenting data in real time.

EDUCATION

Gayatri Vidya Parishad

Bachelor's of Technology, Compute Science Engineering - 7.5

Aug 2018 - July 2021

Sanketika Polytechnic College

Diploma, Electrical and Electronics Engineering - 86

Jul 2015 - Jun 2018

NRI Indian Springs

Achievements

Townhall Recognitions:

- Received the "**Super Rookie**" award for two consecutive quarters, recognizing exceptional performance and quick adaptability as a fresher. Demonstrated strong initiative, consistent delivery, and a proactive approach to learning and contributing from day one.
- Received the "**Super Techie**" award at DBS Tech India for delivering impactful technical solutions and demonstrating strong ownership soon after completing one year. Recognized as a dependable team player who consistently contributed to the project's technical growth and innovation.
- Recently honored with the "**Star Performer**" award during the final recognition at the townhall for developing an exceptional POC that led to significant cost savings for the organization. The solution showcased innovation, practical impact, and strong business value.
